

## VODAFONE

Vodafone Global Enterprise Limited is a multinational company which provides telecommunications and information technology services to large corporations and communities.

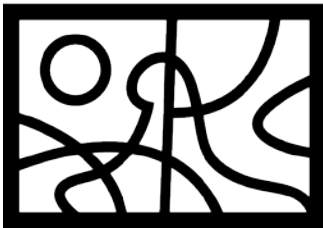

## THE PROBLEM

In order to assure full compliance with current laws and regulations, Vodafone, as well as any other companies which processes sensitive and personal information, **must retain data for several years.**

To meet these legal obligations, the company choses magnetic multimedia such as cassettes and CDs for the storage of its data because this represent the ideal solution for the long term.

### KEY CHALLENGES:

- Not enough space available
- Increase in the number of information to be archived
- High operational costs

## THE SOLUTION

With the aim to save precious space to dedicate to high value activities, Vodafone decided to install **18 mobile bases COMPATTA Light with manual hand wheel** for the efficient and safe storage of cassettes, DVDs and CDs.

The shelving has been specifically designed and realized for the magnetic media.

The COMPATTA Light system allowed to **save up to 40% of floor space**, compared to traditional static shelving.

### TECHNICAL DATA:

Model	Mechanical handwheel
Items	Magnetic media
No. of bases	18
Maximum load for base	10,000 kg
Dimensions (WxDxH)	3,770 x 345 x 2,192 mm

**compatta** Light

**ICAM**
